

THE BROLLY BENCH

GREAT FOR COLLEGE CAMPUSES, PARKS, CIVIC CENTERS AND ALL PUBLIC SPACES.

ENVIRONMENTALLY FRIENDLY & LOW MAINTENANCE

Concrete lasts a long, long time and requires little attention. It can also be recycled when it outlives its usefulness.

BEAUTIFUL & COMFORTABLE

THE BROLLY BENCH is functional art. It's comfortable to sit on and it's fascinating to look at. Your options are endless and no two BROLLY BENCHES have to look alike but no one will mind if they do!

DURABLE

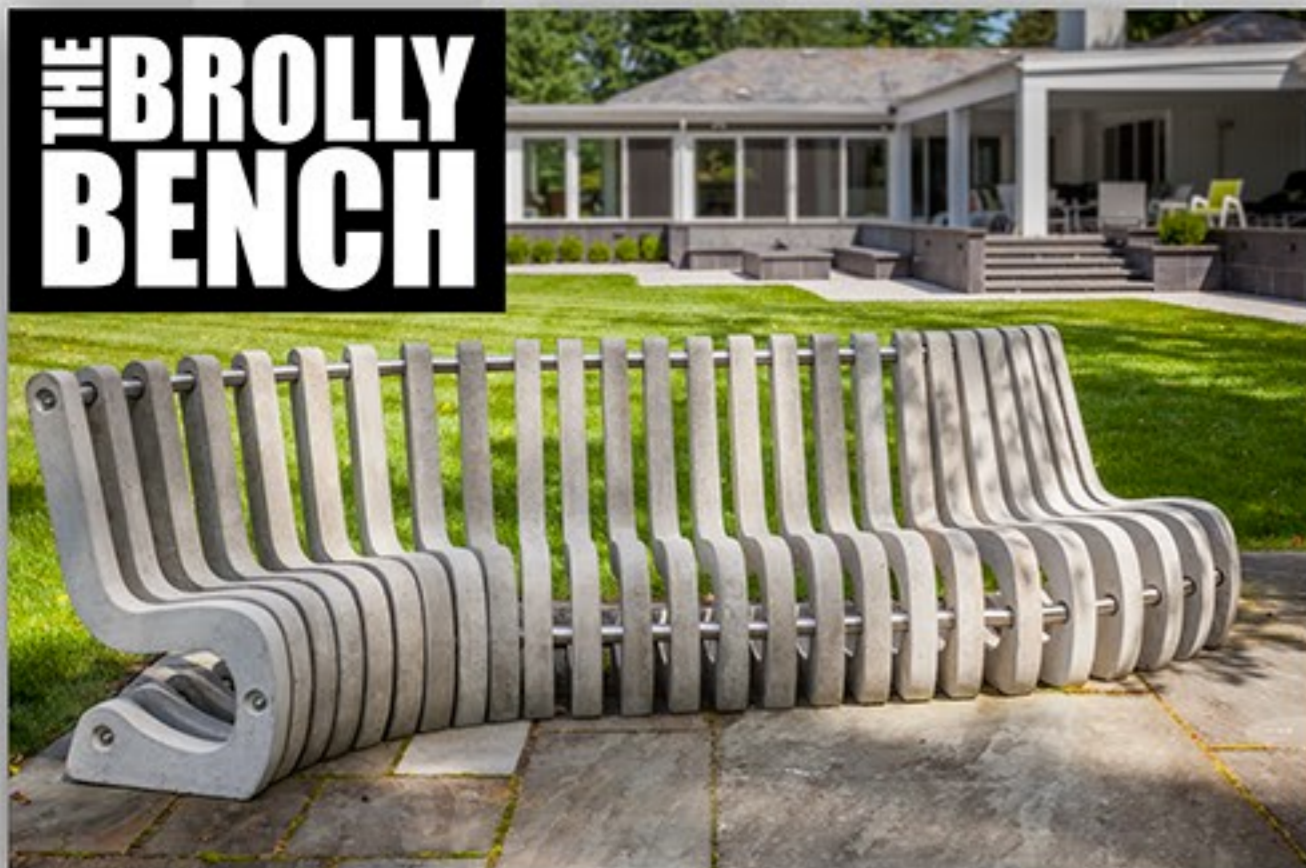

The BROLLY BENCH is durable and tough. Skateboarders will find it difficult to ride any portion of the surface. The Brollly Bench protects like a barrier but doesn't look like one. Each 3" cast concrete segment is 5000 psi strong and reinforced with 17' of rebar and weighs 78 pounds. A ten piece section weighs 800 pounds.

CUSTOMIZABLE

The BROLLY BENCH is customizable and can fit on almost any level landscape so make yours as long, short, straight, or curvy as your space allows. The BROLLY BENCH'S economical use of space, its fluid nature and its ability to fit anywhere provides a lot of seating in a fun, visually interesting way. It can be assembled on-site by two people.
